

WeldUniverse SOFTWARE

BRINGS MANAGEMENT AN INSIGHT INTO THE WELDING PART
OF PRODUCTION FROM A COMPLETELY
NEW PERSPECTIVE

Data analysis and graphic displays

Shows realistic picture of production

Enables to easier plan, organize, manage and control
production and its processes

Sections

DEVICE MANAGEMENT

WELDER MANAGEMENT

PRODUCT MANAGEMENT

Advantages:

- fast and efficient monitoring of the welding process in real time
- early recognition of errors (Error notification system)
- stored in cloud
- accessible to all registered users anywhere and at any time through internet
- welding process reports
- supporting the quality departments (QS), welding control, production process planning, etc.
- integration into the production management system (MES) and the enterprise resource management
- individual improvements at the customer's request
- access via various smart devices
- user friendly
